Professional Summary

Backend Developer with nearly 2 years building secure REST APIs in Java and Spring Boot. Independently developed a 12-module corporate services platform with JWT/RBAC security and optimized production performance through query tuning, backed by a strong analytical foundation in Mathematics.

Technical Skills

Languages: Java 17, JavaScript (ES6+), SQL

Backend: Spring Boot 3, Spring Security (JWT, RBAC), Node.js, Express.js, REST APIs, MVC Architecture

Databases & Caching: MongoDB, Redis, Oracle SQL, Query Optimization

DevOps & Tools: Docker, Git, GitHub Actions, Linux (Ubuntu), SSH, PM2, JUnit, Postman, Swagger/OpenAPI

Frontend: React.js, HTML5, CSS3

Concepts: Authentication & Authorization, CI/CD, Design Patterns

Experience

Navigant International Private Limited

Jul 2025 – Present

Full-Stack Web Developer

Project: Corporate Service Portal & Admin System

Java, Spring Boot, MongoDB

- Built **12+ REST API modules** for a corporate services and recruitment portal — spanning **authentication, admin, job postings, applications, lead management, case studies, reviews, notifications**, and activity logging — within a **modular Spring Boot** architecture using **Controller-Service-Repository** patterns.
- Enforced access control across **protected endpoints** using **Spring Security, JWT**, and **RBAC**, spanning **3 user roles**.
- Resolved a performance bottleneck caused by an **N+1 query pattern**, optimizing MongoDB data retrieval and reducing API response time by **20%**.
- Implemented **input validation**, centralized exception handling, and structured logging across **40+ endpoints**, collaborating with frontend developers to standardize API contracts.
- Integrated **Cloudinary** for image storage and optimization, reducing media payload size by approximately **20%**.
- Configured **CI/CD workflows** using **GitHub Actions** and **Docker**, reducing deployment effort by **30%** and enabling automated releases.

Project: Intelligence Survey Platform (Baretz + Brunelle)

Node.js, Express, React, MongoDB, Tauri

- Maintained and enhanced an enterprise survey and reporting platform serving international clients, on a **React, Tauri, Node.js, Express, and MongoDB** stack.
- Diagnosed and resolved **production issues** across authentication, data processing, and reporting modules, improving stability of an inherited codebase.
- Engineered **JotForm webhook integrations** across **5+ survey workflows** for automated data ingestion, processing, and reporting.
- Automated **CSV and PDF report generation**, replacing a manual compilation process with **on-demand exports** and accelerating data delivery to clients.
- Gathered requirements directly from **international stakeholders**, translating business needs into technical solutions across multiple releases.

SCL Networks

Sept 2024 – Jun 2025

Software Developer

Project: Enterprise Web Application

Java, Spring Boot, Spring Security, MongoDB

- Validated **API contracts**, request/response structures, and performance metrics across **30+ endpoints** using **Postman** and **Chrome DevTools**, identifying integration issues and bottlenecks pre-deployment.
- Progressed from API validation to independently owning design of a secure **authentication and authorization module** (**Spring Boot, Spring Security, JWT, MongoDB**), implementing **role-based access control (RBAC)** across **2 user roles**.
- Tested and validated application functionality across multiple releases, ensuring **API reliability** and **data integrity** prior to production deployment.

Education

Noida Institute of Engineering and Technology

Oct 2023 – Aug 2025

Master of Computer Applications (M.C.A.)

K.K.P.G. College, Etawah

Jul 2019 – Jun 2021

Master of Science (M.Sc.) in Mathematics
