PROFESSIONAL SUMMARY

Software Developer with a strong analytical foundation in Mathematics and hands-on experience building backend applications using Java, Spring Boot, Node.js, MongoDB, and Redis. Skilled in developing secure RESTful APIs, database optimization, caching, and authentication using Spring Security (JWT/OAuth2).

TECHNICAL SKILLS

Languages: Java 17, JavaScript (ES6+), SQL
Core CS Fundamentals: Object-Oriented Programming (OOP), Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks
Backend Development: Spring Boot 3, Spring Security, Node.js, Express.js, RESTful APIs, MVC Architecture
Frontend: React.js, HTML5, CSS3
Security: JWT, OAuth2, RBAC, Authentication & Authorization
Databases & Caching: MongoDB, Redis, Oracle SQL, Query Optimization
DevOps & Tools: Docker, Git, GitHub Actions, Jenkins, Linux (Ubuntu), SSH, PM2, JUnit, Postman, Swagger/OpenAPI
Software Engineering: System Design Fundamentals, API Design, Design Patterns, CI/CD

EXPERIENCE

Navigant International Private Limited

Jul 2025 – Present

Full-Stack Web Developer

Project: Corporate Service Portal & Admin System

Java, Spring Boot, MongoDB

- Developed backend modules within a **modular Spring Boot** architecture using **Controller-Service-Repository** design patterns to improve maintainability and code organization.
- Secured **10+ APIs** using **Spring Security**, **JWT**, and **RBAC**, enforcing access control across **3 user roles**.
- Resolved a performance bottleneck caused by an **N+1 query pattern**, optimizing MongoDB data retrieval and reducing API response time by **20%**.
- Designed and documented **RESTful APIs** with **input validation**, centralized exception handling, and structured logging to support frontend integration.
- Integrated **Cloudinary** for image storage and optimization, reducing media payload size by approximately **20%**.
- Configured **CI/CD workflows** using **GitHub Actions** and **Docker**, reducing deployment effort by **30%** and enabling automated releases.

Project: Intelligence Survey Platform (Baretz + Brunelle)

Node.js, Express, React, MongoDB, Tauri

- Contributed to the maintenance and enhancement of an enterprise survey and reporting platform built with **React**, **Tauri**, **Node.js**, **Express**, and **MongoDB**.
- Collaborated directly with **international client stakeholders** to gather requirements, troubleshoot issues, and deliver feature enhancements across multiple survey workflows.
- Supported **JotForm-based survey workflows**, including webhook integrations, data processing, reporting automation, and issue resolution.
- Implemented enhancements to **authentication**, **data processing**, and **reporting modules** while resolving production issues across the application stack.
- Streamlined **CSV and PDF report generation** pipelines, reducing manual reporting effort and improving data delivery to clients.

PROJECTS

Novel Nest Online Bookstore ↗

MERN Stack, JWT, Netlify

- Designed an application with **User Authentication**, **Product Catalog**, and **Shopping Cart** functionalities.
- Developed **RESTful APIs** with Node.js/Express, utilizing **Mongoose Indexing** to optimize search queries for a **500+ book inventory**.
- Implemented **Responsive Web Design** principles using modern CSS, ensuring **100% Accessibility (WCAG)** across mobile and desktop.
- Deployed frontend to **Netlify** and backend to **Render**, ensuring **99.5% application uptime** and SSL security.

EDUCATION

Noida Institute of Engineering and Technology

Oct 2023 – Aug 2025

Master of Computer Applications (M.C.A.) – CGPA: 8.60

K.K.P.G. College, Etawah

Jul 2019 – Jun 2021

Master of Science (M.Sc.) in Mathematics – Percentage: 66.7%

CERTIFICATIONS ↗

Design Thinking for Innovation (Coursera) • **Introduction to Python** (Infosys Springboard)
Cloud Computing Fundamentals (Infosys Springboard) • **Linux Command Line** (Infosys Springboard)
